

# Prophix Financial Performance Platform

Software to Simplify & Automate  
Financial Processes

The cutting-edge financial performance platform that is designed to transform the way businesses handle their financial processes. Prophix is trusted by strategic finance teams and is tailored for finance leaders who are looking to unlock their potential for success. With its security-first approach, seamless data integration, and AI-powered insights, Prophix is the ultimate tool for financial management.

**Budgeting and Planning:** Prophix streamlines budgeting and planning processes, improving collaboration. It automates time-consuming processes like budgeting, forecasting, and reporting, ensuring timely completion with necessary dependencies

**Financial Close:** Prophix automates reconciliation, consolidation, and reporting to shrink close windows with greater accuracy. It uses AI-driven anomaly detection to analyze data for outliers, highlighting actionable insights and expediting their discovery and resolution for a faster and more accurate financial close

**Reporting and Analytics:** Increase data accuracy and reporting efficiency with Prophix. It provides a single, unified view of your financial data, and its easy-to-use interface simplifies the management of integrations. This affords you more time for valuable analysis

**Financial Consolidation:** Prophix simplifies financial consolidation by automating the process, ensuring accuracy and compliance. It integrates data from various sources and provides tools for currency conversion, intercompany eliminations, and financial reporting

## Key Features

Choose Prophix to achieve new levels of financial performance through automation, workflows, and AI, while ensuring the security and integrity of your data:

- **Security First Approach:** Prophix prioritizes the security of customer data, maintaining compliance with industry standards, and employing cloud technology to provide a trusted and secure financial performance platform. It maintains a comprehensive set of information security and privacy programs and audits to protect information, identities, applications, and devices.
- **Seamless Data Integration and Centralization:** Prophix's data integration capability simplifies the connection and exchange of data between Prophix and other business systems, providing a single, unified view of your financial truth. It allows for easy management of existing integrations and the addition of new data sources without the need for costly 3rd party solutions or IT.
- **Workflow and Automation:** Prophix allows you to automate your most time-consuming processes. Cycles like budgeting, forecasting, reporting can be set up with the necessary dependencies to allow the next step of your process to be started automatically once its predecessors have completed. It encourages engagement and collaboration with status on upcoming tasks, deadlines, and reminders.
- **AI Insights:** Prophix uses artificial intelligence to analyze your data and provide clarity on key insights and trends to enable better business decisions faster. It also allows for the automation of repetitive jobs with an intelligent task assistant designed to free you up to focus on more strategic work.
- **AI-driven Anomaly Detection:** Prophix's anomaly detection analyzes 100% of an organization's general and sub-ledger data for outliers and then highlights actionable insights. Leveraging machine learning AI, it detects and surfaces unusual transactions and organizes them by risk rating, expediting their discovery and resolution. This results in a faster and more accurate financial close with less risk.
- **Scalability:** Prophix is a modern, scalable platform designed to grow with you. It allows you to access Prophix anytime, anywhere from any device, and it integrates effortlessly with business systems to provide a single view of your financial truth.
